

CortiBalm's Many Uses

Through the years of marketing Dr. Dan's CortiBalm around the country we have had numerous Doctors and patients speak with us on alternate uses for CortiBalm. Through their own trials, they have found Dr. Dan's CortiBalm is not only good for severely chapped lips, but is also effective for many other applications. Some of the other areas that they have had great success with CortiBalm include psoriasis, eczema, lupus (side effects), perioral dermatitis, fever blisters, and calluses. We have also had a large number of people use it for their recovery after permanent make-up as well as helping people getting treated with radiation or chemotherapy. I would like to list some of the first hand discussions I have had with customers and physicians.

- First off even though we do not promote **CortiBalm®** for fever blisters (**CortiBalm®** will not kill the virus that causes the outbreak), but what it can do is greatly reduce the time that the topical redness, cracking, inflammation, and irritation are a bother or even noticeable.
- Chemotherapy and radiation therapy patients often develop dry lips associated with their prolonged treatment. This can get so bad that it is hard for them to even drink through a straw. **CortiBalm®** will reduce the pain, inflammation and discomfort associated with their dry lips.
- Auto immune diseases are often associated with dry, sensitive lips. **CortiBalm®** can be effective in reducing those symptoms.
- Under the nose when you have red inflamed nostrils from blowing it regularly-one night with **CortiBalm®** and your discomfort under your nose will be no more.
- Sun and wind burn can often produce painful, dry, cracked lips. **CortiBalm®** is excellent for treating painful lips associated with either wind or sun exposure.
- Skin peels and skin resurfacing can result in painful, dry lips and **CortiBalm®** will get them back where they need to be in no time at all
- Dry climates associated with low humidity can also result in dry, cracked lips and with **CortiBalm®** that will be a thing of the past.
- **CortiBalm®** can also be used just like a 1% hydrocortisone stick. If you have a red, dry, or irritated spot on your body just rub some **CortiBalm®** on it and you will be amazed how quickly it disappears.
- **CortiBalm®** is also great with bug bites, as well as small outbreaks of different types of ivy.

One of the greatest attributes of Dr. Dan's CortiBalm is that it does have so many different uses. Each of which are effected with the same quality and effectiveness that has been proven with its aid in healing lips in less that ½ the time it would take other lip balms. I truly believe that a tube of **CortiBalm® can replace the tube of 1% hydrocortisone you have in your medicine cabinet and you will be much more pleased with the results from CortiBalm®.**

Thank you,
Keith Pittman
