Section 6. Accidental Release Measures	
Personal precautions and protective equipment:	Ensure adequate ventilation.
Environmental Precautions:	Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Local authorities should be advised if significant spillages cannot be contained. Do not flush into surface water or sanitary sewer system. Prevent from entering into soil, ditches, sewers, waterways and/or groundwater.
Containment / clean up methods:	Soak up with inert absorbent material (e.g., sand, silica gel, acid binder, universal binder, sawdust). Prevent product from entering drains. Sweep up and shovel into suitable containers for disposal. Clean contaminated surface thoroughly. If liquid has been spilt in large quantities clean up promptly by scoop or vacuum.

Section 7. Handling and Storage	
Precautions for safe handling:	Wear personal protective equipment. Handle in accordance with good industrial hygiene and safety practice. Keep away from open flames, hot surfaces, and sources of ignition. Avoid contact with skin, eyes, and clothing. Ensure adequate ventilation.
Conditions for safe storage:	Keep in properly labeled containers. Keep away from open flames, hot surfaces, and sources of ignition. Keep container tightly closed in a dry and well-ventilated place.
Incompatibilities to avoid:	Generally, there are no incompatible materials. However, if Copper, Zinc, or Aluminum are present in Section 3, do not add anything to adjust the pH..

Section 8. Exposure Controls and Personal Protection	
OSHA Permissible Exposure Limit (PEL):	2-Propanol TWA: 400 ppm / 980 mg/m ³
Threshold Limit Value (TLV):	2-Propanol TWA: 200 ppm STEL: 400 ppm
Other exposure limits:	2-Propanol – NIOSH IDLH 2000 ppm
Engineering controls:	Ensure adequate ventilation, especially in confined areas.
Personal protective equipment:	Eye/face protection Safety glasses with side-shields. Skin and body protection Protective gloves. Respiratory protection If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.
